

"Brutal and Symphonic" - Anti Hero Magazine

Epic Death

Photos by The Houston Metal Project

"The band's eerie and haunting metal sound reminds me of England's, Cradle of Filth and Behemoth. They easily mix metal screaming with smoother lyrics which reminds me of Dani Filth's perfect performances in this genre. This is an excellent album for those who love melodic death metal. Epic Death delivers on everything this genre is known for and more."

- Cheryl Frishman - AXS

Texas-based metal band **Epic Death** live up to their name in more ways than one: with an imposing musical pedigree and decades of combined experience in multiple bands across several genres, they weave a tapestry of sinister sonic atmospheres, bringing together the imagery, theatricality and brute force of classic black metal, thrash and technical death metal with eerie soundscapes, apocalyptic lyrics and haunting melodies, drawing influence from such iconic bands as Slayer, Dimmu Borgir, Death, Cradle of Filth and Behemoth, while simultaneously exploring dark new horizons in extreme music.

With their core lineup in place, the band quickly began their rise to prominence, gaining acclaim both within and beyond the Lone Star State, sharing the stage with metal heavyweights from all points of the globe – including Carach Angren, Nile, Finntroll, Mushroomhead and Gemini Syndrome, to name just a few – and have played high profile venues such as Minnesota's annual NYDM Festival and Houston's legendary Scout Bar. They are also prominently featured in Derek Norman's 2012 documentary "Heavy in Houston," and back before the cameras in the sequel "Heavier in Houston".

Epic Death's debut full-length album "Witchcraft," produced with Stephen Bogle (formerly of acclaimed industrial act The Hunger), has made great strides enabling them to crush and conquer – once again confirming the phrase "Things are bigger in Texas" with their own brand of colossal, uncompromising metal.

Epic Death frequently plays Houston, Dallas, Fort Worth, San Antonio and surrounding areas. The band has a strong following live as well as online in the United States and all over the world. The band goes above and beyond when bringing people to shows and selling tickets that fill the venues.

"While the band's own music is excellent, I have to admit the song that really brought a smile to my face was a cover of Alice Cooper's Poison. This puts the epic in death and justifies its inclusion in the group moniker. To take a rock anthem and make it your own while staying sympathetic to the original shows real class. Epic Death pull it off with aplomb."

- Get Your Rock Out!

"Complex metal, with growling vocals that are woven completely and compellingly into the fabric of the music. Intriguing, Zappa-esque time changes, thundering and driving drums, the band lives up to its name, bringing epic melodies and riffs to and underscoring of death metal and classic rock."

"I'll be honest, kids: if I were at a party, and this one came on the stereo, I'd be the guy crossing the room to find out who it was. Why of course, it's Epic Death." - Coma Music Magazine
